- Backend:** REST APIs, Node, Express, Flask, MySQL, MongoDB,
- Tools:** AWS, GCP, IBM Cloud

EXPERIENCE

- Corridor Platforms** Remote
Full Stack Developer (Intern) May 2023- present
- Draggital** Remote
Full Stack Developer (Intern) Jan 2022 - May 2022
 - Project - Ak Diagnostics Lab:** Website for booking tests where admin can perform CRUD operation on tests and can update content in the admin panel. Everything on this website is dynamic (for eg. About, contact, blogs, Gallery page, etc.) i.e admin can update content from the admin panel
 - Project - Healo:** Fully E-commerce website where users can buy, and add products in cart and wishlist. All pages on this website are dynamic. The price unit of products on this product is based upon location. Added Payment gateway using Razorpay. The technology used :- NextJs, Payment Gateway, Nodejs, JWT, MongoDB, Firebase, Recoil - State management, Restful-API

PROJECTS

- NextGenUi:** Next Gen UI is a home for front-end & UI/UX developers. We provide all the necessary components required to build a scalable front-end application that suits the user experience in a unique way. It also provides HTML react code for various react components to the users which can be used in their applications.
- Finkarma:** Finkarma provides simplified digital information about the financial markets at your fingertips,. Technology used :- NextJs, Redux, Django, MySQL
- Easyhaionline:** EasyhaiOnline is an Indian ed-tech organization and the preferable learning partner for students. Technology used :- React Native, Redux, NodeJS, Express, MongoDB
- BuzzTalk:** BuzzTalk allows users to listen to both audio and video podcasts. Users can search for their desired podcast, view a list of the most popular podcasts on the main dashboard, and mark podcasts as favorites for easy access later. Create playlists and with curated podcasts. Additionally, users can resume playback of a podcast from where they left off if they need to pause it. Users have access to Dashboard where they can create or add new podcasts, along with details such as the podcast name, description, category and type (audio/video), and the speaker. Technology:- Nextjs, Tailwind, Redux, Express.js, MongoDB, Cloudinary
